

When is a flatbread worth its weight in gold?

When it's chosen the winner in the 2004 Summer Fancy Food Show – Outstanding Baked Good, Bread, Grain or Cereal category. Our Chives and Garlic took the gold because there is no other flatbread like it. Our whole line of flatbread is oven baked with all natural ingredients, using no preservatives, no trans fats, no yeast and no sugar. The result is a thin, crisp and lightly textured home-style flatbread that will be worth its weight in gold when it comes to sales.
